LETTER OF INTRODUCTION

We are pleased to introduce Morrebs ICT, a technology hub and academy committed to equipping individuals, institutions, and communities with relevant digital skills and innovative technology solutions.

At Morrebs ICT, we provide hands-on training in digital literacy, cybersecurity, front-end development, IoT and robotics, while also offering technology services such as website development, social media management, and digital consultation.

Beyond training, we are passionate about community impact. Through initiatives such as free JAMB mock examinations, subsidized tech programs, school partnerships, and outreach to NGOs and underserved communities, we continue to create access to technology and digital education.

We look forward to exploring opportunities for collaboration and partnership that align with shared goals and mutual impact.

Warm regards,
Management Morrebs ICT

About Morrebs ICT

Introduction

Morrebs ICT is a tech hub and training academy dedicated to equipping individuals, schools, and organizations with digital skills that prepare them for the future.

We believe technology is not just for a few, it's for everyone. Through our academy, community programs, and digital services, we empower learners of all ages to thrive in today's tech-driven world.

Our Courses & Training Programs

- Microsoft Office Suite (Word, Excel, PowerPoint, Access)
- Canva Design, Google Workspace and Social Media Management
- Basic and Advanced Cybersecurity
- Web and App Development
- Blogging, Content Creation & Marketing
- WordPress Development

Special Programs & Initiatives

Summer Tech Classes

Our Summer Tech Classes are designed to introduce children and teenagers to the exciting world of technology in a fun, hands-on way. From coding and design to robotics and digital creativity, we make tech learning simple and engaging.

Our Aim:

To spark curiosity, creativity, and confidence in young minds, preparing them for the future of work and innovation.

How We Do It:

Our instructors, alongside interns and NYSC members, facilitate project-based lessons that combine learning with play. Students explore coding, Canva design, and robotics through interactive exercises and showcase their projects at the end of the program.

Special Programs & Initiatives

Free JAMB Mock Examinations

At Morrebs ICT, we believe that access to education is a right, not a privilege. Our Free JAMB Mock Examination initiative gives secondary school students the opportunity to test their preparedness before the official UTME.

Our Aim:

To help students gain confidence, understand the exam structure, and improve their performance through hands-on, computer-based mock testing.

How We Do it:

We organize free mock sessions in our ICT lab, guiding students through real-time CBT simulations. With the help of our team and volunteers, we created a supportive environment where students practiced, learned, and received personalized feedback.

Special Programs & Initiatives

SIWES Internship and NYSC Development Program

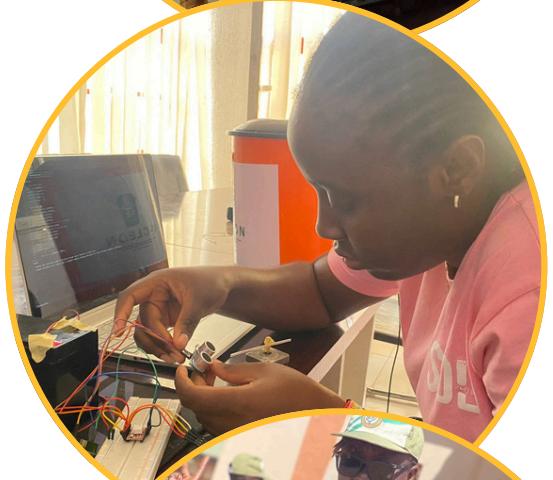

At Morrebs ICT, we're passionate about grooming young minds for the future of work. Through our SIWES Internship and NYSC Development Program, we provide real-life training opportunities that help students and corps members gain valuable hands-on experience in the tech industry.

Our Aim:

To bridge the gap between academic learning and workplace experience by helping interns and NYSC members develop practical skills, confidence, and professionalism in the field of technology and digital innovation.

How We Do It:

We welcome students on SIWES placements and NYSC corps members to join our team across various departments. Each participant receives mentorship from experienced staff, engages in live projects, and contributes meaningfully to real-world initiatives.

Special Programs & Initiatives

Consultation & Mentorship

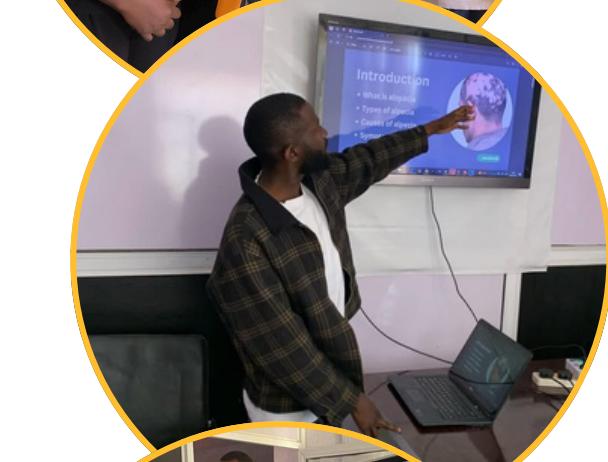

We understand that every learner and organisation has unique needs. Through our Consultation and Mentorship Program, Morrebs ICT provides personalised guidance to students, business owners, and schools looking to integrate technology or develop their digital strategy.

Our Aim:

To empower individuals and institutions to make informed tech-related decisions that foster growth and innovation.

How We Do It:

We conduct one-on-one sessions both online and in person to help clients identify their goals, choose the right tools, and implement practical digital solutions for growth.

PARTNER WITH US

Swipe to the next page to learn how you can partner with us to create meaningful impact by supporting young people who are eager to learn but lack access and opportunities. Through this partnership, you can help bridge the gap and empower them with relevant skills for the future.

Partnership for JAMB Mock Examinations

Morrebs ICT organizes JAMB Mock Examinations as part of our commitment to educational support and student preparedness. These mock exams help candidates gain confidence, understand the examination environment, and improve performance.

We invite organizations, schools, and partners to support this initiative through strategic collaboration.

Areas of Partnership Support:

- Publicity and awareness (flyers, banners, radio announcements, social media promotions)
- Provision of laptops and technical equipment
- Support for power supply (fuel for generator or electricity coverage)
- Sponsorship of logistics and operational costs

Impact of the Partnership:

- Improved exam readiness for candidates
- Increased access to mock examinations for students
- Enhanced educational outcomes within the community
- Public recognition of partners as supporters of education

Through this collaboration, partners will play a vital role in strengthening academic preparedness while contributing meaningfully to community development.

Become An Admissions Partner

Morrebs ICT provides practical, industry-relevant technology training programs designed to equip secondary school students, tertiary institution students, and young people in the community with essential digital skills for the future. These programs focus on improving digital literacy, employability, and career readiness.

Through the Admission Partner Initiative, we invite organizations, schools, and partners to collaborate with us in expanding access to these trainings through strategic sponsorship and support.

Areas of Partnership Support

- Sponsorship of training slots for 5, 10, or more participants
- Provision or purchase of laptops and learning devices
- Support for training logistics and operational costs
- Full or partial funding of cohort-based training programs

Impact of the Partnership

- Increased access to quality tech education
- Empowerment of young people with practical, future-ready skills
- Improved employability and digital competence
- Positive community and social impact
- Public recognition of partners as supporters of education and youth development

Through this partnership, collaborators will help bridge the digital skills gap and create opportunities for young people to learn, grow, and thrive.
